Developed by: Gaurav Katre | Power BI Dashboard

Insights:-

- 1. Revenue peaked in March at approximately \$118M, indicating the highest demand during the January–April analysis period.
- 2. Credit card payments accounted for the majority of trips and generated the highest revenue, indicating that digital payments are the preferred choice among passengers.

Business Recommendation:-

- 1. Increase the number of taxis during busy hours and in March to reduce waiting time and increase revenue.
